Highlights

During the second quarter, the value of the Fusion shares decreased 3.3% from USD 1.50 per share (on December 31, 2016) to USD 1.45 per share on June 30, 2017.

In May 2017, Fusion filed a fraud claim for USD 2.9 million against Apptix ASA related to a software license audit claim, plus an additional claim for USD 15.9 million in compensatory damages. Pursuant to the Share Purchase Agreement signed with Fusion, all representations and warranties made by Apptix ASA were discharged at the time of closing (November 2016). Under US law only a claim for fraud could be made post-closing.

While the Company regarded the claim as speculative and totally unfounded, the claim was carefully reviewed by the Company and its legal advisors. As such, it was the Company's belief the claim was tenuous and groundless. During the second quarter, the Company focused its main efforts addressing this matter as any such outstanding claim would only delay or impede any longer term initiatives planned by the Company.

On August 2, 2017, the Company settled the outstanding claim with a cash payment of USD 150,000 and the return of 300,000 shares of Fusion stock. As of the settlement date (August 2), the aggregate value of the returned Fusion stock was approximately USD 375,000. The Company also expects to incur approximately USD 225,000 of legal fees related to this case. In total, the gross value of the settlement costs (including legal fees) is approximately USD 750,000. The Company's insurance provider will reimburse Apptix ASA approximately USD 475,000 reducing the net settlement costs to approximately USD 275,000.

Additionally, as part of the settlement agreement, the Company agreed to postpone the delivery of the remaining 2.7 million post-settlement shares to its shareholders from November 2017 to February 2018. The settlement agreement includes a full release by Fusion; therefore, no further claim can be presented in the future.

"The speculative claim was a distraction for the business during the second quarter. We are pleased to put this issue behind us so we can now return our attention the longer term opportunities for the Company" said Johan Lindqvist, Chairman of Apptix.

Financial Results – Second Quarter and Year to Date 2017

Following the sale of Apptix, Inc. and consistent with the first quarter 2017, the Company did not record any operating revenues during the second quarter of 2017 as compared to USD 6.5 million during the second quarter of 2016. As previously reported, the Company does not anticipate any operating revenues to be recorded during 2017.

Operating expenses (including depreciation and amortization) for the second quarter of 2017 totaled USD 232 thousand as compared USD 168 thousand during the first quarter of 2017 and USD 3.7 million for the same period in 2016. Operating expenses during 2017 primarily consist of board remuneration fees, professional fees (legal, accounting and consulting) along with public company costs such as stock exchange registration and insurance. The higher operating expenses during the second quarter of 2017 as compared to the first quarter of 2017 included the Company's audit & tax fees. Operating expenses for the six months ended June 30, 2017 totaled USD 401 thousand as compared to USD 7.5 million for the same period in 2016.

The net loss for the second quarter of 2017 totaled USD 235 thousand as compared to a net loss of USD 167 thousand during the first quarter of 2017 and net income of USD 207 thousand for the same period in 2016. The net loss for the six months ended June 30, 2017 totaled USD 403 thousand as compared to net income of USD 333 thousand during the same period in 2016. The variance in net operating results relate primarily to the sale of Apptix, Inc. in November 2016.

During the second quarter of 2017, the value of the Company's investment in Fusion decreased to USD 4.3 million as compared to USD 4.7 million at March 31, 2017 and USD 4.5 million at December 31, 2016. The decrease in share value is reflected as part of the Company's Comprehensive Income and Statement of Changes in Equity.

Including the impact of foreign exchange, the net cash used in operating activities totaled USD 217 thousand during the second quarter of 2017 as compared to cash used of USD 236 thousand during the first quarter of 2017 and cash used of USD 1.1 million during the second quarter of 2016. The cash used during the current period primarily reflects the net operating loss along with changes in working capital accounts. Year to date, net cash used in operating activities totaled USD 453 thousand as compared to USD 2.6 million during the same period in 2016. Again, the primary variance related to the sale of Apptix, Inc. in November 2016.

There were no cash flows used for investing or financing activities during the second quarter of 2017 as compared to USD 44 thousand (for investing activities) and USD 676 (for financing activities) during the second quarter of 2016. Additionally, there were no cash flows expenditures for investing or financing activities during the first six months of 2017. The Company used USD 91 thousand (for investing activities) and USD 1.8 million (for financing activities) during the first half of 2016.

The Company ended the second quarter of 2017 with USD 855 thousand of available cash balances.
